Application Instruction

Combo 2 Enduro NLIS Sheep Tag

To be applied with

Enduro Tags Applicator Model ETA1-Sheep

Combo 2 tags are applied to sheep either at lamb marking, weaning or as mature ewes.

We design and manufacture Enduro Tags for long term retention and functionality.

We offer replacement lifetime warranty on this NLIS device. Seek further information on our website.

Warranty may be forfeited if tags are not applied according to supplied instructions.

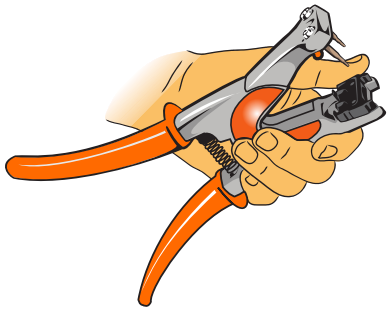
ADD CONTACT

Please read and follow the instructions to maximize ease of tagging and for correct ear placement.

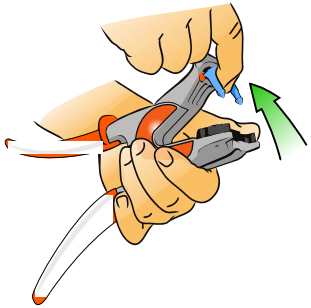
Note: all our tags are applied with the applicator in vertical orientation and best to apply from in front of the restrained animal.

Loading the Applicator

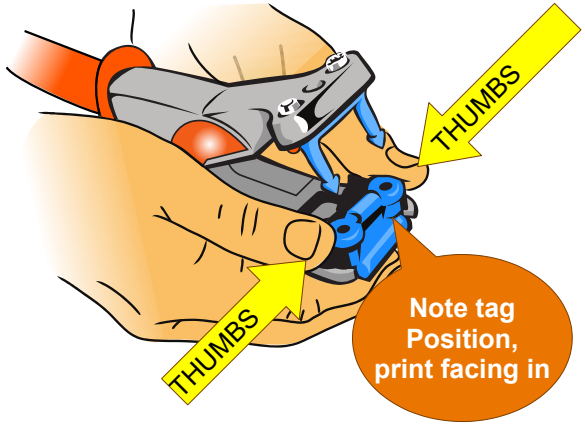
1) **Hold** the applicator in one hand supporting **under the tagging head.**



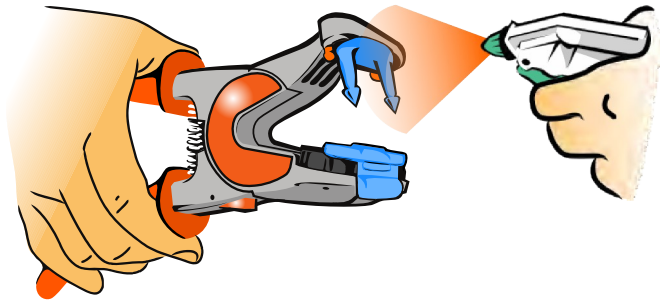
2) **Push** the **male clip** onto the pins until the clip locks onto the rubber bumps



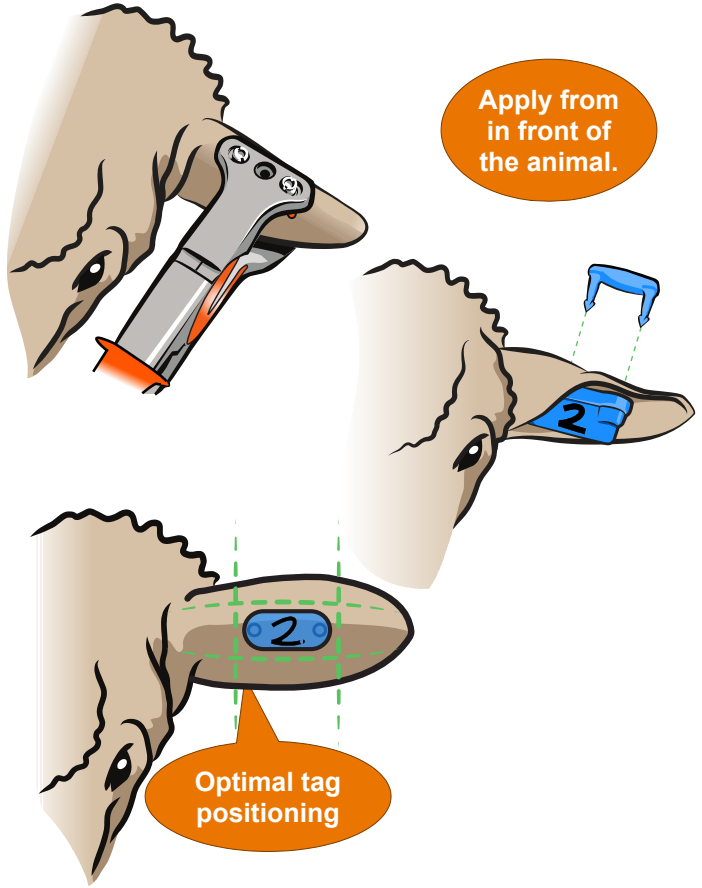
3) **Push** the **female part** of the tag using both thumbs into the lower holder, note the holes face **up** and **print side faces inward.**



4) We recommend pre-soaking male clips in a 4% 40ºC-50ºC solution for a few minute or spraying a 4% Betadine or another antiseptic solution on the male clips,especially in **humid weather**.



5) Approach sheep from the front and apply the tag to the middle of the ear in front of the crease line.



For any queries regarding tag application contact Dr John Steinfort 0428 595-957 or checkout the Resources section of the website

ENDURO TAGS

Innovative Livestock Identification

We continue to improve our tags through innovation and customer feedback

1) Retention through design

- double pin clips
- minimal catch points
- double locks

2) Standout tag visibility

- wider neck tags
- stay centrally fixed
- “High Tag” options

3) Stay cleaner

- tags have shiny non-stick surface
- minimises dirty/dusty tags

4) Dark laser print

- laser burns into the tags
- wide range of tag print options

5) Transponder technology

- ear tag placement orientation optimises eID reads.
- quick responsive reads
- excellent transponder durability.

6) All Australian

- designed, trialled and proven
- Australian owned, manufactured in Victoria
- fast turn around times

7) Proven Longevity

- nylon male clip tag
- strong and robust
- UV stabilised

8) A lifetime replacement warranty

Combo 2 – Long Term NLIS Tags

Enduro Sheep Tags

Combo 2 Electronic NLIS Sheep

High performance two piece tag with exceptional transponder historical and current performance, coupled with excellent and proven retention over 10 years.
Can be applied to lambs at lamb marking,weaners or adult sheep. Application technique is easy to follow and repetitive, with patented cutting edges on the locking heads, enables the tag to penetrate the ear readily and lock.

Combo 1 Visual Sheep Tags

A two piece tag designed for long term retention by design. Highly visual tag with management numbers visible when working in yards or close range. Inscriptions includes your management serial number, farm name, and/or brand and choice of bright year colours.
Expect greater than 99% retention per annum.

Combo 1 Ram Tag

These tags are ideal for stud rams long term identification. Many studs use these tags as a secondary or VID tag to their NLIS tags. Information can be lasered on top and bottom tags.

Typically Top tag information Ram Number and Stud Name and Bottom tag information Sire Name, Year , Mobile Number, PIC etc.

Livestock Tag Applicator

This is a quality Australian Made alloy livestock applicator, especially designed for use with our unique two pin livestock tags. The applicator can be configured to work with the Sheep tags or the Cattle tags, It is easy to change with a large common screwdriver and small phillips screwdriver.

W63mm x H46mm

ETF2 Medium Stud Ewe Tag

Provides excellent visual ID for calves, ewes, gilts and sows. The tag is held well within the ear, doesn’t rotate and through design, there are less chances of the tag being caught, snagged and pulled apart.

Our economic sized tag for most tagging requirement in smaller livestock. Paired with the Economy or Medium Clip this is a cheap and durable tagging option.

ETF1 Stud Ewe Tag

A very economical and high retentive tag as a year marker and property identification or age differentiation for station or large herds.
Also used for stud ewes and piggeries for breeder identification.

W46mm x H32mm

Available in Year Colours and Pink

“One can make a difference if you endure and hold sight of your vision”
John Steinfort BVSc. Company Founder and CEO

Collectively, our customers and staff have all assisted us in holding that vision. Your feedback is invaluable and encouraging. Our staff are diligent and passionate about our tags. Through this team effort, we bring you our innovative tagging system, making a difference to your time spent tagging and managing your livestock.

ETSF1 Small Female Birth Tag

ETSF1

These unique tags are light weight and suited for ALL stud stock at birth, and weigh only 4 grams. IDEAL FOR STUD LAMBS AT BIRTH. The tags provide a visual management number that can be read from 5 meters. Each tag component has unique anti-catch features, providing retention rates of 99% per annum.

W30 × H30 mm

A ideal birth tag for lambs. Very lightweight and lasered serial numbers.

Ideal for tracking and recording sires with tag colours and serial numbers for birth chronology.
* Requires ETSM1

ETSF4 Large Female Management Tag

W59 × H88 mm

Ideal for stud ewes as a large management tag, with Enduro unique anti-snag features. Is applied with the ETSM1 tags, is light weight and has antibacterial agent. A large tag that is readily visualized in the field for identification and pairing of ewes with lambs.

ETSM1 Single Pin Small Male

W20 × H40 mm

This tag is made from a hard durable Nylon with x2 cutting edges.

The tag is designed with no overhanging edge allowing the tag to rotate a full 360 degrees. This allows the tag to rotate to disengage from snagging objects. Fast, simple, and easy application. Minimal animal reaction as very quick and cuts through the ear without tearing. Ideal for small livestock where a lightweight tag is necessary.

W57mm x H45mm

ETM2 Medium Clip

For young livestock for shorter term visual management from the back of the ear.
Designed for beef calves or stud ewes.

ETM1 Stud Ewe Clip

The economical double pin male clip component is designed to be coupled with all our double lock female tags.

It provides the highest retention and used with the ETF2 and ETF1 sheep management tags where tag retention, differentiation and visibility are important.
